

## JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Recently retired, after spending many years working with his brother to build their crane company into an market leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

All through their journey, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast marketplace for a product that could promptly and securely lift people in the air to accomplish upkeep and other construction functions.

After returning from their trip, John set up a joint venture with two of his friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design elements of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the company has extended itself into several global marketplaces and continues to develop new equipment to guarantee that clients are able to become safer and more efficient within their workplace.
