The U.S. lift Truck division situated in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

In the beginning the home-based lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a domestic equipment expansion venture. Sales of these goods were primarily targeted to state-run companies, large scale corporations, and the military. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Home-based lift truck business for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a position of considerable expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint enterprise project to counter act competitive pressures in the US materials handling industry. This endeavor radically expanded Daewoo's forklift sales. Construction was finished in 1984 to facilitate a new plant which helped set up the company for the fabrication of high end added-value goods suited for export. In 1993, the corporation had a international sales network and started exporting designs they had developed through in-house technology, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into overseas marketplaces.
