

## Advance-Nilfisk Part

Advance-Nilfisk Part - Think about how long and tiresome it would actually be to tidy up right after a party, with no assistance from equipment. Previously, the dust from carpets and upholstery had to be beat out of them manually; brushes, cleaning cloths and brooms were the leading cleaning products at the time.

The founder of Nilfisk-Advance, P.A. Fisker, started out as an electrical engineer who really liked to work on electrical motors. After starting his company in 1906, he started to make motors to drive coffee grinders, fans, machine tools and drills. Mr. Fisker's dream from the start was to own an international company advertising goods worldwide.

The Nilfisk C1 was a tremendous breakthrough for the cleaning trade. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed just 17.5 kilos and can be operated by a single individual. This creation came in a time where many cleaning equipment were massive and needed 4 or more operators, hence, the Nilfisk C1 changed everything and evolved the manner we clean forever. The brain behind these first cleaning machines remains unparalleled. Cleaning machines provide an excellent solution to an ongoing problem; things get filthy and should be cleaned on a regular basis, without a lot of effort.

Slowly but steadily, Nilfisk-Advance expanded all through the years. During the nineteen eighties, this growth actually took place the time the business became a part of the NKT Group. Their new owners' drive and focus made Nilfisk-Advance take a huge leap ahead within the business, aiming to be one of the largest international players in the market of professional cleaning equipment. Nilfisk-Advance is now located in all parts of the globe by gradually acquiring numerous smaller companies to be able to grow their product selection and presence in new markets. They are proud to present various cleaning solutions to fit every requirement.
